

AcuMobile Security Features

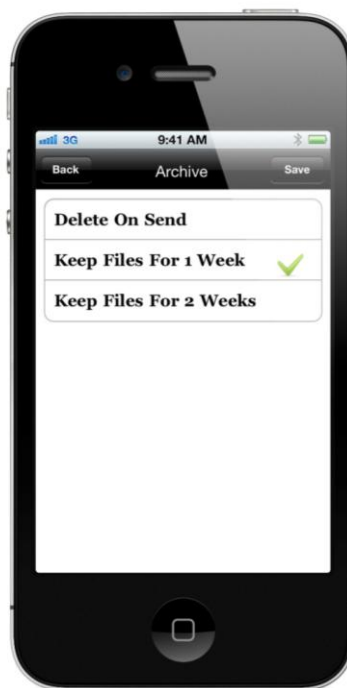

At Acusis, we ensure your data and information is secure. AcuMobile takes advantage of the iPhone's closed architecture to protect your data. No other program or user has access to the data contained within AcuMobile.

In addition, all of the communication to and from your iPhone® is secured with 256 bit encryption.

Secure Login

- All users are required to use their eTranscribe Login ID and Password to access the application
- AcuMobile follows strict authentication protocols for passwords including strength rules and automatic expiration after 30 days

Archive Setting

- The user has the ability to set and change the archive setting within the application
- By default, the voice files will be removed from the iPhone after 1 week
- The user can change the setting to delete the voice files after they have been sent to Acusis or after 2 weeks

Auto Logoff Setting

- The user has the ability to set and change the auto logoff setting within the application
- By default, the user will automatically log out of the application if it is inactive for 15 minutes
- The user can change the setting to 30 or 60 minutes
